Hi Cathy,

Thanks for getting back to me. I also sent along an email which Christie St. Claire responded to. The site is the West Lake Landfill in St Louis. We spoke with an activist about the nuclear contamination at the site and the demands of community members to be evacuated. We're looking for a statement from the EPA on the contamination system at Westlake, the risk from the nearby fire at the Bridgeton landfill, and the demand by nearby residents for an evacuation.

Thanks and best,

Emmett

Hi Emmitt:

I just received your voice mail about a site that EPA Region may oversee. You said it was a radioactive site—which may not be under EPA's purview, but DOE or NRC. Can you send

us some information? My Region 7 colleagues are copied on this email.
